

Leave the law as it stands in New Jersey. State laws can be more stringent than federal laws. We the people who do not wish to be annoyed with telemarketing scemes should not be subject to endless phone calls. Now they are allowed to call cell phones. Who is picking up the cost in Cellular minutes for the consumer. Email is attacked everyday as well. Why can't the people elect who wants to be called and who doesn't. We elect our politicians. This country is built on democracy. Therfor the law should not be challenged and left alone.
